INDEPENDENT SOFTWARE PROJECTS

iCarus | Independent Software Engineer & UI Developer | 2026–Present
GitHub: github.com/xdaedalusx/icarus
• Independently developed a native macOS media player using SwiftUI, featuring audio/video playback, media downloads, customizable interfaces, and interactive controls.
• Engineered a modular skinning system supporting custom and image-based layouts, including Windows Media Player (.wmz) skin importing and conversion.
• Architected reusable components separating playback functionality from presentation; developed a visual Skin Inspector and sandboxed JavaScript runtime supporting animations, events, and dynamic UI behavior.

RESEARCH & UX PROJECTS | UNIVERSITY OF FLORIDA

Enhancing Collaborator Communication in Extended Reality | XR Researcher & Developer | 2024–2025
• Developed AR prototypes integrating eye tracking, real-time shared-gaze visualizations, and interactive feedback.
• Led three controlled mixed-methods studies (n=60+) evaluating usability, collaboration, social presence, and task performance.

ENKIx: Enabling Knowledgeable Task Guidance | UI Designer | 2021–2024
• Developed an interactive AR task-guidance prototype using Unity, C#/.NET, and ArUco-based computer vision; designed contextual interfaces for complex workflows.

EMG-Based Prosthetic Simulation in Virtual Reality | Researcher & Developer | 2020–2023
• Developed Unity VR simulations and regression/deep neural network models for real-time EMG gesture classification; evaluated usability and cognitive workload against physical devices.

PROFESSIONAL EXPERIENCE

Federal Public Defender, Northern District of California | Computer Systems Administrator | Mar–Sep 2026
• Supported attorneys and administrative staff across five offices, troubleshooting Windows systems, applications, printers, peripherals, and network connectivity in a distributed WAN environment.

EDUCATION

Ph.D., Computer Science — University of Florida, Gainesville, FL | 2025

SKILLS

Development: Swift, SwiftUI, C#/.NET, Unity, Python, R, Git, TensorFlow
UI/UX: Figma, Interaction Design, Prototyping, Interface Development, Usability Testing
Research & Analytics: Mixed-Methods Research, Experimental Design, ANOVA, Regression, Data Visualization
Technologies: macOS Development, AR/VR, Computer Vision, Eye Tracking, Real-Time Visualization
AI Tools: Claude, AI-Assisted Development, Research & Analysis
